

Fair Isle

alka

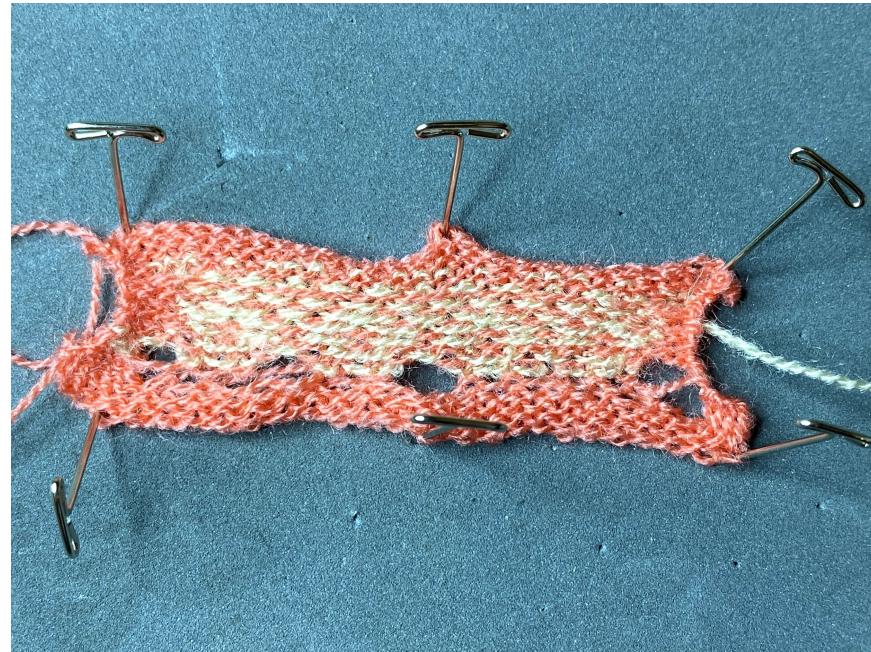

Alternate colors and leave unused colors stranded in the back

First Try

<https://www.thesprucecrafts.com/fair-isle-stranded-knitting-2116385>

fair-isle-2.k

Second Try

Now generated knitout file with
javascript
(three_color_fair_isle_generator.
js)

Introduced colors in an
alternating row at beginning to
maybe fix gaps at the beginning
of pattern

Odd rows were reversed

fair_isle_3.k

Third Try

Slightly modified pattern

Fixed odd rows

fair_isle_4.k

Still slightly wonky

Moving Forward

There are still gaps at the beginning of the pattern

Turns out there was an error in three_color_fair_isle_generator.js that skipped a row at the beginning of the pattern (maybe that's it? Anyways, don't use that one, it's jank)

Now have fair_isle_generator.js : input your own pattern with as many colors as there are carriers (would not recommend using more than two colors per row)
